Afridho Rachmadi Kartawiria

Senior Front-end Engineer | Full-stack & AI Integration

Bandar Lampung, Indonesia | +62 822 8271 3326 | afridhorkartawiria@gmail.com
Portfolio: https://afridhork.vercel.app/ | LinkedIn: linkedin.com/in/afridho-r-kartawiria-aa8025182

PROFESSIONAL SUMMARY

Senior Front-end Engineer with 5+ years of experience building business dashboards, Freight Management Systems (FMS), CRM, TMS, LMS, and real-time applications. Experienced with TypeScript, JavaScript, React, Next.js, Vue.js, Nuxt.js, Laravel, MySQL, REST APIs, and component-based architecture. Improved page rendering speed by 40% through data flow, state management, and API response optimization. Also experienced in Frappe/ERPNext customization and AI integration for applications and workflow automation.

CORE SKILLS

Frontend Engineering: TypeScript, JavaScript, React.js, Next.js, Vue.js, Nuxt.js, Redux, Zustand, Tailwind CSS, component architecture, state management

Backend and API: Node.js, Express.js, Laravel, PHP, REST APIs, API integration, API design

Data and Real-time: MySQL, Redis, relational data modeling, database design, SQL query optimization, WebSocket

Frappe/ERPNext: Frappe CRM, custom apps, overrides, workflows, forms, custom fields, fixtures, reports, business logic

AI and Automation: LLM integration, prompt engineering, automated design pipelines, Python automation

Engineering Practices: Full-stack feature delivery, debugging, API validation, production issue resolution, cross-functional collaboration

PROFESSIONAL EXPERIENCE

ATT Group — Senior Front-end Developer

April 2021–Present

Hybrid | Bandar Lampung

- Delivered end-to-end features across frontend, backend, API, and database layers, including database design and SQL query optimization.
- Developed TMS workflows from order creation and pickup through warehouse delivery for air and ocean export operations, including driver management and Mekari Talenta API integration.
- Built authentication, protected routes, and role-based access for drivers, head drivers, and document teams.
- Built CRM dashboards and reporting for leads, deals, and quotations.
- Proposed, researched, and defined an override-based Frappe/ERPNext customization approach through a custom app so CRM changes did not modify core code and stayed safer across upstream updates.
- Customized Frappe CRM workflows, forms, custom fields, fixtures, reports, and business logic for lead, deal, quotation, event, and related operational processes.
- Worked with engineers, designers, and business stakeholders to translate operational needs into technical solutions and resolve production issues.
- Optimized API data flow when the backend returned five datasets in a single response by redesigning selective parameters, simplifying the response, and refactoring state management; this improved page rendering speed by 40%.

Freelance / Self-employed — Full-stack Developer

2020–2021

- Built custom web applications for clients using React.js and Express.js, including an employee management system.
- Delivered features from database and API design through UI implementation and initial deployment.
- Worked directly with clients to understand business requirements, prioritize features, fix bugs, and improve application performance.

SELECTED PROJECTS

- **TMS Platform:** Developed order workflows from order creation and pickup through warehouse delivery for air and ocean export operations, including driver management and Mekari Talenta API integration.
- **CRM Platform:** Built dashboards and reports for leads, deals, and quotations, and customized Frappe CRM workflows, forms, fields, fixtures, reports, and business logic.
- **LMS Platform:** Developed frontend features across a three-application ecosystem for admin, training institutions, and students.
- **Automated AI Design Pipeline:** Built a generative AI workflow for design asset creation.
- **Real-time Game State Sync:** Implemented low-latency game state synchronization using Redis and WebSocket.

Project details are available on the portfolio website.

EDUCATION

University of Lampung — Bachelor of Computer Science (S.Kom)
